

REDBACKS® KNEE PAD

- Leaf spring technology
- Reduces point pressure & distributes weight
- Certified to CE EN 14404 Type 2 Level 1
- 100% continuous support
- Supports 0 to 450kg by auto adjusting to individual's weight
- Can be left in work trousers for washing at 40°C
- Waterproof
- Breathable
- Thermal protection from warm and cold surfaces
- 16mm penetration protection
- Curved to fit around knee
- Long term use (4000 hours)
- 100% recyclable pad
- Tested and approved by Staffordshire University

REDBACKS® KNEE PAD

9180-188

Redbacks® patented system uses a soft flexible leaf spring embedded within a honeycomb matrix to absorb and spread weight. Unlike any other knee pad the technology disperses pressure away from the knee to provide unrivalled comfort and protection.

Redbacks® are designed to fit tightly into the knee pocket of workwear trousers. Position the red side of the fabric cover to face the knee, with the tapered end of the pad pointing down. Squeeze the knee pad firmly and insert into pocket. If required, the knee pads can be trimmed to fit the pocket without affecting performance.

QUALITY: Rubber

COLOUR: 20 Black

SIZE: One Size
